

Silk Screen Printing Supply *Products Information*

Pneumatic Auto Cup Heat Press Machine AS-CA35

Description:

A heat press machine is the machine that presses a transfer onto an imprint able substrate. Using high temperatures and pressures for a certain amount of time, the transfer is permanently embedded into the product.

Heat presses are recommended for professional and satisfying results simply because standard laminating devices and home hand irons cannot get even near the temperatures required for a reliable transfer.

Specification:

Voltage: 220V/110V
Power: 600W
heating element size: 9.5x15cm
Package Size: 54X32X86CM
G.W:40KG--88LBS

How to print your digital photo onto Cap:

- a. Take a digital photo
- b. Print it out on sublimation or transfer paper with your printer
- c. Set temperature to 170-190 Celsius
- d. Set the desired time (varies from 20 sec. to 45 sec. Longer time leads to darker impression)
- e. Put the paper in the position which you want print on Cap
- f. Your customized Cap is done! Very Simple
