

Silk Screen Printing Supply *Products Information*

Cap Heat Press Machine AS-CM28

Description:

A heat press machine is the machine that presses a transfer onto an imprintable substrate. Using high temperatures and pressures for a certain amount of time, the transfer is permanently embedded into the product.

Heat presses are recommended for professional and satisfying results simply because standard laminating devices and home hand irons can not get even near the temperatures required for a reliable transfer.

Specification:

Voltage: 220V/110V

Power: 600W

Heating element size: 9.5cmx15cm

Package Size : 64X48X38CM

G.W: 17KG--33LBS

How to print your digital photo onto T-shirt/Cloth/Garments:

1. Take a digital photo
2. Print it out on sublimation/transfer paper with your ink-jet printer
3. Set temperature to 170-180 Celisus
4. Set the desired time (varies from 20 sec. to 45 sec. Longer time leads to darker impression)
5. Put the paper in the position which you want print on Cap
6. Your customized Cap is done! Very Simple
