## Screen-clean SC771

### PROPERTIES

Screen-clean (SC771) is a grey colored aqueous paste of abrasives and surfactants containing a mixture of alkali and solvent. Screen-clean is fast acting and highly effective at removing ghost images and stain on all types of mesh.

### INSTRUCTIONS FOR USE

Screen-clean is sold strictly for use in the screen printing industry for effective removal of hazes and ghost images commonly left after stencil reclaiming. It negates the need for an additional solvent application.

Screen-clean may also be used to degrease and chemically abrade new or used aluminum frames prior to stretching.

#### To remove Stains or Ghost images:

1. Clean off all ink residue prior to stencil removal.
2. Remove stencil with recommended decoating chemical product.
3. Apply a small amount of Screen-clean (SC771) to both sides of the wet mesh with a brush, thoroughly covering the stained areas in a circular motion.
4. Leave to stand for 5-10 minutes. If left to stand for longer periods, Screen-clean can damage the fibred of the mesh.
5. Rinse off residue with gently water spray.
6. Remove stain with high pressure stripper.
  - Not suitable for use on natural silk meshes.

Due to partial separation, Screen-clean may require stirring if left to stand for long periods. Screen-clean may also be used to degrease and chemically abrade new or used aluminum frames prior to mesh stretching.

### STANDARD PACKING

Screen-clean is available in the following pack size:

- SC771 /kg
- SC771/ 5 kg
- SC771/ 25 kg

### STORAGE

Screen-clean should be stored in a cool dry place at 20-25°C.

### SAFETY AND HANDLING

Screen-clean should be used with care. Wear suitable PPE, for example, appropriate gloves and safety glasses.

#### Screen-clean:

- Is free from any toxic, carcinogenic, mutagenic and reprotoxic chemicals.
  - Does not have a flashpoint and is, therefore, exempt from the Highly Flammable Liquid Regulations
- Please consult the information on **the Safety and Handling of Screen-clean** in the Sabinecolors Material Safety Data Sheet.

### ENVIRONMENTAL INFORMATION

#### Screen-clean:

- Does not contain heavy metals.
- Is formulated free from ozone depleting chemicals as described in the Montreal Convention.
- Is moderately biodegradable as determined by the OECD 301D Closed Bottle Test.
- Does not have any volatile solvents and is therefore less harmful to the environment when compared with solvent-based products.
