### (JP-135SR/A2) DC Servo Vinyl Cutter/Cutting Plotter

This is the basic model of the servo vinyl cutter series in 48" upright version. The servo vinyl cutter series is driven by servo motors. Servo motors are more accurate, much quieter, faster and more powerful. This version includes a laser alignment system for registering your vinyl to the cutter for performing contour cutting.

The 135SR/A2 servo vinyl cutter is the best choice for classroom and office environments as the servo motors are very quiet. It is an upright cutter driven by servo motors. With a maximum clearance of 53.1", this cutter is perfect for running 15" to 48" vinyl. Perfect for running sign vinyl, heat transfer material and a variety of other release liner backed materials. With servo motors driving the media, this cutter is capable of cutting thicker materials. This version includes a laser alignment system for registering your vinyl to the cutter for performing contour cutting.

Motor: Servo  
Maximum Cutting Width (mm): 1260  
Maximum Media Width (mm): 1350  
Measurements (cm): 160 x 41 x 34  
Gross Weight (kg): 38  
Net Weight (kg): 35  
Feed System: Direct Pull  
Construction: Aluminum Alloy, ABS End Caps  
Maximum Drawing Speed (mm/s): 960  
Maximum Cutting Speed (mm/s): 960  
Control System: Servo Motor  
Power (w): 25  
Tracking: 3  
Maximum Force (g): 750  
Maximum Force Increment (g/step): 3  
Mechanical Resolution (mm/pulse): .01254  
Connections: RS-232, USB  
Power Supply: AC 110V-240V / 50-60HZ 6A  
Maximum Noise (dB (A)): 35  
Ambient Temperature Range °C: 5 - 35  
Command Language: HPGL  
Media: Release liner backed materials, magnet, stencil  
Pen Included: Yes  
Included Blades: 30°, 45°, 60°  
Packaging: Machine in carton box, stand in carton box, two carton boxes are individual  
Computer Connection: True USB, no driver needed, direct connection to USB Printer  
Carriage Type: Cutting head with 4 wheels  
Contour Cutting: Laser target, semi-manual  
Straight Line Speed (mm/s): 0 - 960  
Curve Speed (mm/s): 0 - 600  
Motor Speed (RPM): 0 - 3500  
0-3000 RPM Time Idle Load (milliseconds): 20  
0-3000 RPM Time Working Load (milliseconds): 1200  
Encoder Signal Physical (line / round): 1016  
Encoder Signal Logical (line / round): 4060

Processor (bits): 64 DSP  
Processor Flash (M): 32  
Accuracy ( $\pm$ mm): .01  
Repeating Precision (mm): .082  
Stand Availability: Upright  
Basket Availability: Yes  
Standard Warranty: 3 Year Parts And Labor  
Perf Cut Capable: No  
CE Certification: Yes  
Color: Grey / Grey  
Compatibility PC: XP, Vista, 7-32, 7-64, 8-32, 8-64  
Compatibility MAC: Yes  
Software - SignCut: PC, Mac  
Software - DragonCut: PC, Mac with BootCamp  
Software - Flexi: PC  
Software - ArtCut: PC  
Software - VinylMaster: PC, Mac with BootCamp  
Software - WinPC Sign: PC  
Software - Onyx: No  
Software - Plug In Driver: Direct Plug In Driver, PC only  
Software - Stencil Cutting: No

- Aluminum alloy construction, nice ABS sides
- Has control of increased cutting speed and laser sensor model  
which has contour cutting
- Straight-line Speed: 50-1150mm/s
- Curve speed: 50-600mm/s
- Motor& Driver: DC servo
- Motor power: 25watt
- Guaranty 5-meter tracking.
- Servo motor speed: 0-3500RPM
- 0-3000RPM time: < 20 MS(idle load); <1200 MS(working)
- Encoder signal: physical 1000line/ round, logical 4000line/round
- Force: 50-500g(10g/step)
- Memory: 512K/4MB
- CPU: 64bit DSP 32MFlash
- Mechanical Resolution: 0.01254mm/pulse
- Repeating Precision: 0.082mm
- Interface: RS-232 / USB
- Format: DMPL/HPGL
- Power: AC110V-240V / 50-60HZ 6A
- Machine power: < 100watt
- Operation acoustic noise level: 65 dB (A) or less
- Standby acoustic noise level: 30 dB (A) or less
- Environmental temperature: 2 - 35°C
- Environmental Humidity: 30%—70% (no congeal water)
- Max. feeding Width: 1350mm
- Max. cutting width: 1260mm
- Packing: 1pcs/inner, 1pcs/export carton
- Meas: 158x32.5x36cm
- G.W./N.W.: 33/31kgs
