TR-80L Light Laser Copy Transfer Paper

Description

TR-80L are designed for laser copy and color laser printers to transfer photos and images to T-shirts, sweatshirts, mouse pads, puzzles, and leather goods of light colors. Choose garments that have a tight weave. This is particularly important when transferring to sweatshirts.

Product is suitable for heat press and home use, and can be transferred with a hand iron.

SPECIAL NOTE:

There are many different types of laser printers on the market, and new ones are being introduced every day. While our laser paper works in **Konica Minolta C series, OKI, Canon, SHARP** printers, also compatible for all laser printers.

Printer Setting

for Konica Minolta C series printers, for an idea print, select the printer setting << Normal paper >> in the best possible quality or,

| | |
|---------------|---------------|
| Paper sours, | Thick 1 |
| Paper side, | reverse print |
| Heating Temp, | 175 – 185c |
| Pressure | Medium ~ High |
| Transfer time | 15 - 20 sec, |

Print the required motif as a mirror image onto the coated side of the transfer paper, the reverse side is marked with a blue square mark.

Transferring Instructions

If shirt is 100% cotton, it will have the tendency to absorb excessive moisture. This can lead to bleeding problems. To avoid this, it is best to pre-heat T-shirt about 5 seconds of 185°C until all the steam is out.

Heat Press Transferring:

- (1). Press the image at 185° C for 15~25 seconds with the heat press, using high pressure.
- (2). Peel off the back paper starting at the corner in 15 seconds after remove the cover of heat press machine, USE CAUTION, PAPER WILL BE HOT.

Iron-On Transferring:

- (1). Set the iron to the cotton stage temperature, and do not add water to the iron. Iron the fabric for a few seconds.
- (2). Place the image face down onto the fabric. Iron the back of the image for a few seconds and let cool for about 10 seconds. Iron the perimeter of the image first, starting at the lower left corner and moving upward along the side to the top left corner. Next, iron the top center of the image moving slowly to the bottom center of the image. Re-iron the image VERY SLOWLY using medium to high pressure. Continue ironing until you have completely traced the sides of the image. This entire process should take about 60-70 seconds for a 20mm x 25mm image surface. Follow-up by ironing the whole image quickly, heating all of the transfer paper again for approximately 10-13 seconds.
- (3). Peel off the back paper starting at the corner immediately in 5 seconds after the ironing process. USE CAUTION, PAPER WILL BE HOT.

Heat Press Machine Transfer processing.

- a. Set heat press machine at 185°C, for 15--20 second using high pressure.
- b. Briefly heat the fabric for 5 second to ensure that it is completely smooth.
- c. Before transferring, cut out the motif without leaving a margin around the edges.
- d. Place transfer paper onto fabric with the printed image facing downwards.
- e. waiting for about 5 second, then peel off the back paper starting at the corner.

Washing Instructions

Wash inside out in cold water do not use bleach. Place into the dryer or do hang to dry immediately.

Material Handling & Storage

conditions of 35-65% Relative Humidity and at a temperature of 10-30°C.
